Agree

Good

Prosthodontics & conservative pre-clinical should be compulsorily done in phantom head or mannequin

Introducing of MCQ in the examination pattern,so that the students are prepared for NEET and other examination

Introduction to MCQ in the examination...so that students are prepared for NEET and other examination

Introduction of basic reasearch methodology to encourage UG students to take up research projects

Introducing of MCQ in the examination pattern so that the students are prepared for NEET examination

Curriculum knowledge is practicable in day today life

Introduction of basic Research Methodology to encourage undergraduate students to take up research projects.

A

Introduction of basic research methodology to encourage undergraduate students to take up research projects

Introduction of basic Research Methodology to encourage undergraduate students to take up research projects. Introducing of MCQ in the examination pattern, so that the students are prepared for NEET & other examination.

H

Subject applicable in daily life

Overall good

mcqs can be added for preparation of neet nd other exams

Introducing of MCQ in the examination pattern,so that the students are prepared for Neet and other examination.

Maximum log last or second last point copy karke paste karenge additional comments mei

Introduction to more methodology to develop interest of ug students in research related matters.

Introduction of basic research methodology to encourage undergraduate students to take up research project.

Introducing of MCQ in examination pattern so that the students are prepared for NEET examination and other examination .

Introducing of basic research methodology to encourage undergraduate students to take up research project

Its a good initiative

It is a good initiative

Introduction of basic Research Methodology to encourage undergraduate students to take up research project
Introducing of MCQ in the examination pattern, so that the students are prepared for NEET & other examination.

Introduction of basic Research Methodology to encourage undergraduate students to take up research project

Good step

Introducing of MCQ in the examination pattern ,so that the students are prepared for next and other examinations.

Introduction of basic research methodology to encourage undergraduate students to take up research project

Introduction of basic Research Methodology to encourage undergraduate students to take up research project
Introducing of MCQ in the examination pattern, so that the students are prepared for NEET & other examination.

Introduction of basic Research Methodology to encourage undergraduate students to take up research project.
Introducing of MCQ in the examination pattern, so that the students are prepared for NEET & other examination.

Introduction of basic Research Methodology to encourage undergraduate students to take up research project
Introducing of MCQ in the examination pattern, so that the students are prepared for NEET & other examination.

Introduction of basic Research Methodology to encourage undergraduate students to take up research project
Introducing of MCQ in the examination pattern, so that the students are prepared for NEET & other examination.

Subject help in developing personality

1.Introduction of basic research methodology to encourage undergraduate students to take up research projects . 2. Introduction of MCQ in examination pattern, so that students are prepared for NEET and other examination.

None

Introducing MCQs in the examination pattern, so that the students are prepared for NEET and other examinations. Introducing basic reasearch methodology so the the undergraduate students are encouraged to take up research projects.

Introduction of MCQ in exam pattern

Introduction of MCQ in exam pattern so tht the students are prepared for neet and other exam

Oral Surgery final year students should be taught I.V. administration including practical on mannequin

Curriculum was helpful

Prosthodontics & Conservative Pre-clinics should be compulsorily done in phantom head or mannequin.
Oral Surgery final year students should be taught I.V. administration including practical on mannequin

1.Introducing of mcqs in the examination pattern,so that the students are prepared for neet and other examination 2.Introduction of basic research methodology to encourage undergraduate students to take up research projects

5

Oral Surgery final year students should be taught I.V. administration including practical on mannequin

Good course

Introduction of basic Research Methodology to encourage undergraduate students to take up research project Introducing of MCQ in the examination pattern, so that the students are prepared for NEET & other examination.

Internal Assessment/ tests/assignments are well planned

Introduction of mcq in exam pattern so that the students are prepared for neet and other examination

Introducing the mcq in the examination pattern,so that the students are prepared for neet and other examinations

Introducing of mcq in the examination pattern,so that the students are prepared for neet and other examination

The subjects helps us in developing our personality. All the things regarding curriculum are very well planned

1)Introduction of basic Research Methodology to encourage undergraduate students to take up research project 2) Introducing of MCQ in the examination pattern, so that the students are prepared for NEET & other examination.

All good

Introduction of basic research methodology to encourage undergraduate students to take up research projects. Introducing of MCQ in the examination pattern,so that the students are prepared for neet and other examination.

Introduction of basic research methodology to encourage undergraduate students to take up research projects. Introducing of MCQ in the examination pattern,so that the students are prepared for neet and other examination

Introduction of basic research methodology to encourage undergraduate students to take research projects. Introducing of MCQ in the examination pattern,so that the students are prepared for neet and other examination

Access to various online journals

Needs to be modified

I request u to provide stipend to pgs and provide technician in department

Guidance from faculty is very good

Train PG students in clinical photography and basics of computer

University may introduce fellowship programme in the subjects of Implant dentistry

University should set-up advanced research lab to provide research facilities like universal testing machine, scanning electron microscope.

Curriculum has lot to teach us but availability of materials and equipment for the same is very limited.

University may introduce fellowship program in the subject of Implant dentistry

More journals can be added in the library

Need time to time guidance

Good experience

Must have some fellowship courses on Microdentistry

University may introduce fellowship program in implant dentistry

Overall its good

Thankyou

Technological advancements can be included and can be more emphasized on.

Should conduct workshop on Microscopic Endodontics.

Train pgs in clinical photography

University may induce fellowship programme in the subjects of esthetic dentistry

University should set up advanced research laboratory to provide research facility like universal testing machine, scanning electron microscope

A patient will always give your reference if he will get a good treatment. Patients pay beyond their capacities to get a good treatment so I think learning is important also atleast one technician should be their in the college so that our minor mistakes that not mentioned in the book but can be learned from experiences should get corrected. Without technician we are facing lot of problems but still struggling to give a good treatment to our patients. So it's my opinion that there should be one technician in the curriculum

Photography documents

Train pg students in clinical photography and basics of computer.

University may introduce fellowship program in the subjects of Implant dentistry.

University should setup advanced research lab to provide research facilities like universal testing machine , Scanning Electron Microscope.

Should conduct seminars and workshop on microscopic dentistry

Curriculum should be improved

Access to various journal sites

University should provide advanced research laboratory to provide research laboratory like universal testing machine And SEM

Syllabus is all fine

.....

Magnification assisted dentistry should be introduced.

Short term courses on Photography and Basic computer science

Medico - legal aspects can be introduced.

University can setup advanced Research lab

Good implementation

Evidence based learning

Need to upgrade with advanced teaching aids and equipments

Curriculum is proper

Structured questions to be incorporated

Dept. Should put more emphasis on students to refer more books written by International authors to compete at International level.

Need improvement with advanced teaching aids and equipments

None

Focus toward clinical practice

Graduate and undergraduate programmes are based on clinical skill development and analytical.

Thank you

Newer teaching methods to be included

Nil

Should incorporate Smart boards for teaching.

Should be Clinical based learning

Post Graduate curriculum is vast and needs lot of efforts to go through the entire basic and speciality syllabus. Above all, working on clinical materials need elaborate knowledge about recent advances.

I'm satisfied

Preclinical should be compulsory done in mannequin

Practical skills needed to be correlated with theory.

Overall good

curriculum is designed to compete the all global standards.

More practical work needs to be incorporated

The course content should be revised to meet the current dental practise

If used to the fullest by students and by teachers all is good

Need to improve with Cloud campus facilities

Curriculum all fine

Everything fine, no amendments required

Thankyou

Very good

academic curriculum is excellent

Students should be focused on practice based learning rather doing fake cases for sake of quota completion

Patient follow up is not adequate

Confidence in students are lacking to handle patients. Our focus is to build confidence in them to handle child patients

MCQ should be included in university exam

More clinical exposure required

No

None.

Curriculum is very well designed

no

Good

Should have paid attention on student's career and how to boost it, inspite of demoralising by talking nonsense and fake on student's character.

Had a good experience of learning

Very good 😊

Little more concern required for personality development

In true education, anything that comes to our hand is as good as a book: the prank of a page- boy, the blunder of a servant, a bit of table talk - they are all part of the curriculum.

Hhhh

That's all

Agree

Excellent institute

More clinical practice required

More clinical practice is required

Good environment for study. A basic theoretical and practical knowledge of all the subjects are taught which i think is very necessary and best part too.

Advancement should be include..

Lagging behind in the field considerably compared to other streams and Countries. Students pass out not knowing what's necessary and have to spend few years learning practical skills.

Nothing-

Nice

All is well

Best college of Chhattisgarh

Great one

Good base created

More of clinical practice is required

Everything is very nice

Advancement is required

The curriculum is informative and helpful

One of the best college in chhattisgarh

I am very proud of being student CDCRI . All my staff are excellent . Each and every staff played very important role in my career

Thank u everyone

Great

Curriculum was good

I have already filled the form

CDCRI has one of the best and finest staff to learn from and growth with.

I personally suggest to increase the inflow of patients.

And more cultural programmes to be held.

More clinical practice is required

It's all fine bss wo Dean badal do sab acha h

Good college

Everything is good

Had a nice experience in CDCRI

Inspirational

Good curriculum

Things were better earlier

Student friendly curriculum should be made.

Best college in Chhattisgarh

Environment and the staff are very supportive in every aspect

Good curriculum

14 responses

Additional Comments

14 responses

Even though syllabus is adequate ,recent advances need to be added

Good presentation

Sufficient enough to study and apply in clinical practice

Clinically it should improve more

Newer advancement knowledge is limited based on clinic practice requirements

Need better infrastructure

No

Need Improvement from Government speciality jobs

The curriculum is well balanced for both clinical and academic aspects

Little bit improvement will require

Needs adaptation of teaching patterns from foreign universities and talents. They are one of the most costliest courses in the world still not worth it

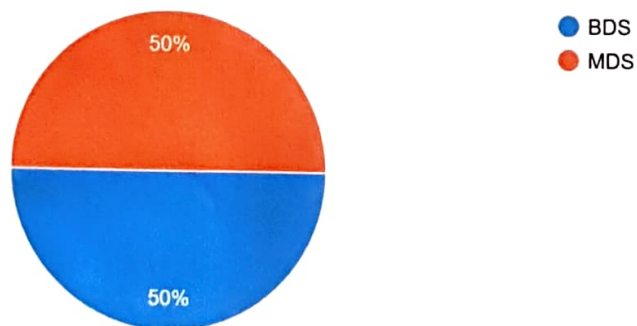

Nothing to say

Good institute with clinical expertise
