

## **Feedback on Curriculum Analysis**

**&**

## **Action Taken Report**

**2021-2022**

The aim of feedback is to get the inputs and suggestions on various aspects of the curriculum. These feedbacks were collected from the various stakeholders like teachers, students, alumni, professionals and employers through Google forms. The opinion of stakeholders enhances the program curriculum and learning outcome. The proforma was developed by the members of Academic Council under the guidance of its Chairperson and the Dean. The feedback mainly focused on the content, design and implementation of the curriculum.

Satisfactory

No Comments

The syllabus must involve a little on the behavioural management of patients for better clinical skill development

Practical training & curriculum are very holistic & satisfactory..

Overall Very good education strategies.

Collaborations with other universities

Emphasis on practical implications should be more.

Department of periodontology pays additional efforts towards team work for better education amongst students.

Need more integrated learning

Provide advanced materials to be updated

Syllabus is satisfactory but student don't study

Dci syllabus is sufficient but students don't study

.)

Syllabus is upto mark and satisfactory even for students it is helpful to understand

Incorporation of modern dentistry and more practical base approach

Include anatomical basis for Nerve blocks

Syllabus covers all topics in systematic way

Satisfactory syllabus

More work on practical knowledge

Digital Dentistry can be added

- Satisfied

Everything is good

No changes

Every department should display the syllabus for internal assessment beforehand.

Practical teaching should be promoted more.

no.

Syllabus should be displayed by every department.

Every Department should display syllabus 15 days before exam

Some subjects which are a bit difficult to connect with can be explained more conceptually

No additional comments

Big subjects but easy to read

Practical teaching and knowledge should be promoted more.

Class hour should be of 6 -7 hr

More better faculty student interaction is felt

Indeed this course and the college is great when you know how to balance everything

It was overall good

Hard work with smart work, and discipline really pays off in the end of year

A Blue print for syllabus distributed among students can help sort out important topics !

Regular test

Best college to develop and explore new knowledge.

None

..

The curriculum is well designed and easy.

Curriculum is well planned

Satisfied

No advice

It's very much helpful developing my career.

Should provide schedule and attendance every month

Curriculum is well planned

Curriculum is nice.

Our college has great academics

our college has great academics.

Teachers are gems who made everything so understanding.

Best collage to improve creativity

Good advantage for students

Just add co curricular

Beat teaching method

Course is ok

Some additional practice for developing concepts

Academic is strong

No additional comment

No additional comments

Videos related to practical topics.

Experience was great

Nothing much

Well planned curriculum

Curriculum was perfectly fine

Experienced teaching staff

This helps me in developing my personality because everything is well planned

Nil.

The curriculum is well planned and good.

It is helpful

Would like to suggest some basic marketing and business ideas to inculcate in syllabus or should be discussed in class. As a medical students we know nothing but our subjects but when we open clinic few basic things should be known to us already.

No questions

I am satisfied with curriculum

institution is good but need some change

Everything is going well

No change is required

The teachers can share the ppt in order to reduce the note making time of the students

The curricular activity is really good.

Need more improvement

Everything is good ne

Need improvement in general surgery practical rounds.

Demo of common surgical procedures should be included

Internal assessment exams must be based on mass learnings rather than subjective

College curriculum are good

I had a great experience

Everything is easy to understand

Practicals can be more compiled with the theories

Learning should be more practical Oriented

The subjects are good and curriculum is also good.

All good

Amazing knowledge i got.

No

Doubts were cleared

none

👍

Good curriculum

Everything is going well

Not required

Not required

Academic good

Satisfied with the curriculum

Everything is perfect

Nil

How to take alginate impression can be introduced in 2nd year preclinical work in ideal dentulous cast just same as we do to make primary impression in ideal edentulous cast...giving more clinical experience in the upcoming following years

Yes it helps a lot

1. How did you find the curriculum?

30 responses

2. The curriculum instructions are easy to follow.

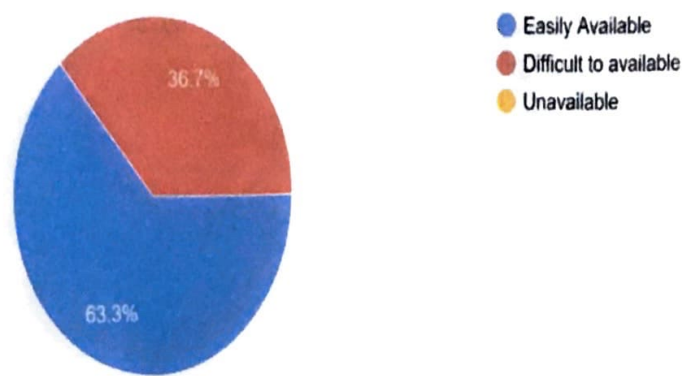

30 responses

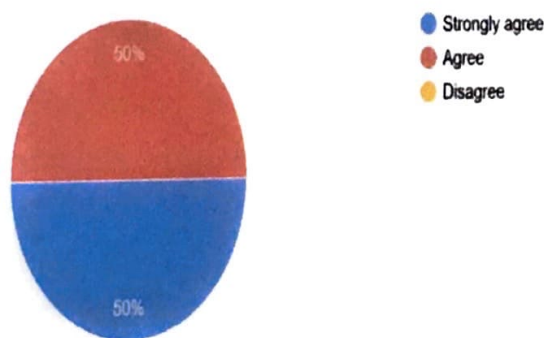

3. Are reading material and references regarding curriculum/subjects easily found?

30 responses

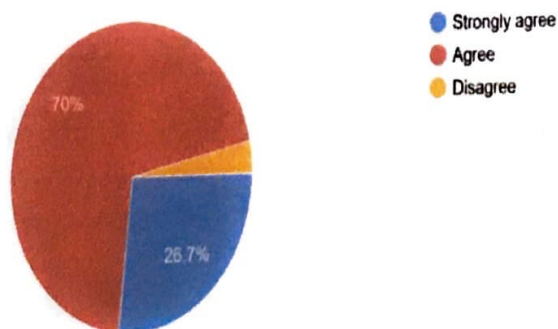

4. The curriculum has relevance to clinical dentistry.

30 responses

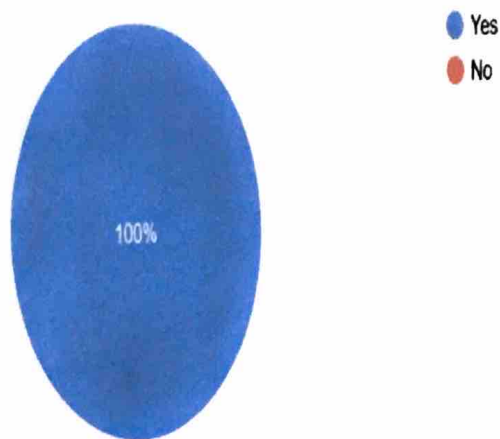

5. The curriculum is designed to provide sufficient opportunities to practice all the techniques prescribed.

30 responses

6. Are the subjects relevant to your future aspirations and help in developing your personality?

30 responses

#### Additional Comments30 responses

None

1. Please include some additional workshops and certified course apart from subject related , for overall benefit of the students. 2. Please include government holidays given by

Chhattisgarh govt. Thank you

Satisfactory with the curriculum

Over all it was a good experience. I have learned from this curriculum

More hands on workshop related to the subject. More co-curriculum activities should be added as we do clinicals patients and study medical subject we need few change is routine activity. More inter departmental understanding and meetings should be there between staffs and pg students.

Patients flow

More CDE programmes, hands on, and other co curriculum activities

Subject relevant to future development

I wish we had a more practical approach towards clinical practice. I also felt that in the earlier period of the residency (first 3 months) there is lack of proper protocol with regards to research, thesis synopsis writing, and overall how to proceed with the studies and exams.

This makes us feel utterly confused and we often have to spend time just to figure out how to make things work rather than actual working and studying. As a maxillofacial surgery resident I did feel a lack of optimal hospital training in my early days of residency, however, I feel this is because of the lack in our UG curriculum. I strongly believe that BDS curriculum should also focus on the hospital training in a little more depth so that residents are more prepared and

confident in medical settings. Although, it is in the course but its is not being implemented as well as it can be. Thank you.

Include surgery

Exam pattern should change according to the present clinical aspects

Useful resources

Convocation should be the part of curriculum

No comments

Y

availability of study materials and presentations help in enhancing knowledge and personality development

NIL

It would be beneficial for students if syllabus for Applied Basic Science is more concise and relevant to Dentistry.

Change is needed

For more advanced Techniques..More advanced instruments are required

no

Demonstration of Hair transplantation should be added. More practical exercises like implant placement, sinus lift should be added.

Everything is good.

No comments everything is good

### **Consolidated Feedback Analysis Report**

<b>Stakeholders</b>	<b>Feedback Analysis Report</b>
<b>Teachers</b>	About 78% faculty believes that the syllabus is Good to Very Good to meet the global perspective. About 81% believe that sequencing of Units/Sections is Good to Very Good. About 84% the curriculum covers Modern/Advanced topics. About 84% believe that the depth of course coverage Good to Very Good. About 93% believe that timely completion of syllabus is possible. About 81% believe that curriculum emphasizes on basic fundamentals and integrates practical learning. About 68% believe that curriculum is adequate to develop clinical expertise, confidence and analytical skills. Usefulness of Internal Assessment/ tests/assignments
<b>Under-Graduate Students</b>	Less than 1% students believe that the curriculum instructions were not easy to follow. About 90% believe that reading material and references are easily found. About 96% students agree that the subjects are applicable in practically. About 97% agree that the Internal Exam are well planned. Also 96% believe that the subjects help in developing the personality.
<b>Post-Graduate Students</b>	About 7% students believe that the curriculum instructions were not easy to follow. About 64% believe that reading material and references are easily found. 50% students agree that the subjects are relevant to clinical dentistry. About 96% agree that the curriculum design provides sufficient opportunities to practice all the techniques. 100% believe that the subjects help in developing the personality.
<b>Alumni</b>	All 100% believe that the curriculum instructions were easy to follow. 100% believe that reading material and references are easily found. About 75% agree that the subjects are relevant to clinical dentistry. About 92% agree that the Internal Exam are well planned.
<b>Professionals</b>	About 72% faculty believes that the syllabus is Good to Very Good to meet the global perspective. All 100% believe that the curriculum instructions were easy to follow. 96% believe that reading material and references are easily found. About 70% strongly agree that the subjects are relevant to clinical dentistry. About 74% strongly agree that the curriculum design provides sufficient opportunities to practice all the techniques. About 96% believe that curriculum is adequate to develop clinical expertise, confidence and analytical skills.
<b>Employers</b>	About 73% believes that the syllabus is sufficient to meet the global perspective. About 68% strongly believe that the curriculum covers modern topics. 68% believe that timely completion of syllabus is possible. About 73% strongly agree that the subjects are relevant to clinical dentistry. About 73% strongly agree that the internal examinations are useful. All 100% believe that curriculum is adequate to develop clinical expertise, confidence and analytical skills.

---

The following important suggestions were also received:

**UG Students**

1. Every Department should display syllabus 15 days before exam
2. Practical teaching and knowledge should be promoted more.
3. More better faculty student interaction is felt
4. A Blue print for syllabus distributed among students can help sort out important topics!
5. Regular test
6. Videos related to practical topics.
7. Would like to suggest some basic marketing and business ideas to inculcate in syllabus or should be discussed in class. As a medical student we know nothing but our subjects but when we open clinic few basic things should be known to us already.
8. The teachers can share the ppt in order to reduce the note making time of the students
9. Need improvement in general surgery practical rounds.
10. Demo of common surgical procedures should be included
11. Learning should be more practical Oriented
12. How to take alginate impression can be introduced in 2nd year preclinical work in ideal dentulous cast just same as we do to make primary impression in ideal edentulous cast...giving more clinical experience in the upcoming following years

**PG Students**

1. Please include some additional workshops and certified course apart from subject related, for overall benefit of the students.
2. More hands-on workshop related to the subject.
3. More co-curriculum activities should be added as we do clinicals patients and study medical subject we need few changes is routine activity.
4. More inter departmental understanding and meetings should be there between staffs and PG students.
5. Subject relevant to future development
6. BDS curriculum should also focus on the hospital training in a little more depth so that residents are more prepared and confident in medical settings.

**Teachers**

1. The syllabus must involve a little on the behavioral management of patients for better clinical skill development
2. Collaborations with other universities
3. Need more integrated learning
4. Provide advanced materials to be updated
5. Incorporation of modern dentistry and more practical base approach
6. Include anatomical basis for Nerve blocks
7. More exposure to Digital Dentistry is required

**Alumni**

1. More clinical exposure is required

**Professionals**

2. More of CDE workshop should be added
3. Curriculum should be based upon competency based dental education
4. Students should be given more chance for clinical practice on patients.

---

### **Proposed Recommendations and Actions Taken based on Feedback**

Institute has very limited role in designing and content of the Curriculum. Hence, Feedback on curriculum from various stakeholders should be used to identify the areas requiring greater elaboration.

- Curriculum enrichment is to be achieved through seminars, workshops and conferences.
- Cross-cutting issues relevant to gender, environment and sustainability, human values, health determinants, Right to Health and Professional Ethics will further be strengthened into the Curriculum by increasing the number of seminars and workshops on the topic.
- Value added course like Continuing Dental Education Program and workshop on current scenario, soft skill program, Practice management, aptitude program, personality development programs, yoga, meditation, time management, spiritual discourses etc should be continued and more topics are to be added. One Value-Added course on recent topics can be conducted by each department.
- HODs to encourage the faculty and students to attend and submit paper in the specialty conferences.
- Modern methods of teaching and learning should not only be continued but will also be encouraged to supplement alternative or traditional lectures for promoting active student participation. Case-based learning, evidence-based medicine, problem-based learning, simulation-based learning, e-learning, peer assisted learning, observational learning, flipped classroom and team-based learning are some of the modern learning methodologies.
- Latest editions of Textbooks and Journals to be added in the Library.
- Strengthen the existing Mentorship Program to monitor the progress of the student and timely resolution of any difficulties faced by student.
- Internal Assessment Examination will be conducted as per the Academic Calendar. The syllabus for the same should be informed to the students in advance. Marks obtained by students should be reviewed and remedial classes should be organized as usual. Parents will be informed regarding student's attendance and other academic related activities.
- Co- Curricular activities should also be encouraged for the overall development of the student.
